

Kewill Flagship Application Integration

Intended Audiences

Business analysts, systems engineers, systems administrators and professional services staff involved building and supporting application integration in black box implementations, user interface customizations and label customizations.

Prerequisite Training

Prerequisites for this course are successful completion of the Kewill Flagship Installation, Configuration and Administration course and access to a licensed copy of Kewill's software developer's kit (SDK).

Course Duration, Delivery and Location

This is a two day course. This course is presently available as instructor led sessions at Kewill's facilities in Massachusetts.

Course Objectives

This course provides a thorough introduction to the Kewill Flagship Application Program Interface and the approaches used for advanced application program integration.

On successful completion of this course, students will be able to:

- Apply pre-requisite application software and database administrative skills in using Kewill Flagship API and related tools to exchange data between Kewill Flagship and client application software
- Tailor certain UI functions to meet client requirements
- Produce custom print labels

Classes run from 9:00am to 4:00pm in Chelmsford, Massachusetts unless arranged otherwise.

Lunch is provided.
