

Kewill Flagship™ Training Brief

Kewill Flagship Installation, Configuration and Administration

Intended Audiences

Technical implementation personnel, IT personnel responsible for maintenance and support of the application, system administrators

Prerequisite Training

This course has no pre-requisite Kewill training; however, student's technical expertise with MySQL Server administration, web application servers such as Apache or IIS, ODBC drivers and general Microsoft Windows administrator tasks is assumed.

Course Duration, Delivery and Location

This is a three day course. This course is presently available as instructor led sessions at Kewill's facilities in Massachusetts.

Course Objective

This course provides a thorough introduction to installation and configuration of Kewill's Flagship Enterprise application software, and related services. Attendees will learn the basic architecture and functionality of Kewill Flagship, and leave the training able to:

- Install the product
- Configure distribution centers and carrier settings
- Configure communication settings required for proper operation of the system
- Perform routine operation and administrative tasks

Classes run from 9:00am to 4:00pm in Chelmsford, Massachusetts unless arranged otherwise.
Lunch is provided.

Kewill

1 Executive Drive, Chelmsford, MA 01824
