

OVERVIEW

Kewill's Less than TruckLoad (LTL) and Generic Carrier modules provide customers compliance for custom local and/or regional carriers and LTLs. Kewill partners with SMC³ providing users access to CzarLite rates, the industry standard for LTL pricing and the ability to import LTL carrier information from SMC³ RateWare.

FEATURES

- Define service types for all required classes of merchandise
- Define rate tables manually or automatically
- Outline zone-driven services or set up simple, non-zoned services
- Define rate tables for both domestic and international shipments
- Impose various discount methods on the rates
- Create packing slips and Bill of Lading forms
